<b>SUMMARY OF THE LECTURE</b>	<p>The speaker began with the introduction to the drug discovery and development concepts. He also elaborated the session on in identifying lead finder and docking. Lead Finder – software for modeling protein-ligand interaction Build model. An in depth knowledge was obtained through this session highlighting on Computational technique which finds the predominant binding, mode of a ligand at a protein binding site, Predicting the interaction energy between two molecules, Virtual Screening on large libraries of compounds. 	the docking studies were clearly explained. The session ended with Q&A and total session was live for about one and half hour.
<b>OUTCOME</b>	The session was very informative for students and faculties. The students were able to Predict the interaction energy between two molecules, learnt virtual Screening on large libraries of compounds. Students also learnt use of software for preparing full-atomic models of protein structure. The students and faculties were benefited with this webinar.
