Criteria to identify advanced Learners and slow Learners

Purpose

Identifying slow and advanced learners is crucial in pharmacy education to provide personalized support and opportunities that enhance learning outcomes. It allows for the implementation of tailored teaching strategies, boosts student confidence, and ensures effective resource allocation. By addressing the unique needs of both groups, institutions can foster collaborative learning, reduce dropout rates, and prepare students for successful careers. This approach improves institutional performance, promotes inclusivity, and equips students with essential skills for academic and professional excellence.

Objective

The institute addresses the differentially able students with the following objectives.

1. To provide guidance and support to the slow learner and advanced learner students.
2. To improve the academic performance of the slow learner students.
3. To motivate the advanced learner students and help students in discovering various options for their career and future.
4. To provide student support for skill development

Responsibility

It will be the responsibility of the subject teachers and mentors to monitor the academic performance of these students and provide them additional support in every manner for their overall development. It will be the responsibility of academic committee to identify and prepare the list of advanced and slow learners at the start of academic year through the process of mentoring with the help of mentors, subject teachers and class teachers.

SANTHIRAM COLLEGE OF PHARMACY

Approved by AICTE & PCI, New Delhi – Affiliated to JNTUA, Anantapuramu
NH – 40, Nandyal, Kurnool District, Andhra Pradesh – 518501

Guidelines for advanced learners and slow learners

1. Each subject teacher is expected to identify the slow learners and advanced learners of the class from the performance of students in assignments or previous University examination. The list of slow and advanced learners shall be submitted to the academic section.
2. During regular classroom teaching and lab sessions special attention should be given to these students.
3. If required, separate coaching can be provided to the slow learners wherein their difficulties shall be solved, course material shall be provided and the assignments should be given to these students.
4. The extra coaching may also include, teaching few difficult topics in the curriculum using charts, models, presentations, videos or actual case studies, assignments given to students such as presentations, reading and preparation of topics, solving numerical and question banks.
5. It is the responsibility of the subject teacher to provide all possible help and support to the students.
6. The academic performance of the slow and advanced learners shall be monitored by every subject teacher throughout the semester.
7. A report on the academic progress of advanced and slow learner shall be submitted to academic section at the end of each semester by every subject teacher.

List of activities for advanced learners

1. Guiding and encouraging to publish research papers in national and international journals
2. Encouraged to attend conferences, seminars, workshops and to present poster and oral presentations
3. Encouraged with cash prizes given by the institution to toppers from each program
4. Students are encouraged to take competitive exams like GPAT, NIPER, PGECET
5. Providing placement activities.
6. Guiding for further studies like MS (Masters) programmes.
7. Group activity leader for assignments and project task.
8. Students are encouraged to organize different curricular and co-curricular activities
9. Conducting Think-Pair-Share activities through the Institutional Innovation Council (IIC).
10. Providing effective training in English communication skills.

Abstract: The prevalence of Parkinson's disease places a significant burden on society; therefore, there is an urgent need to develop more effective drugs. However, the development of these drugs is both expensive and risky. Quercetin (QUE) has potent pharmacological effects on neurodegenerative diseases, but its low solubility in water and poor bioavailability limit its use in pharmaceutical applications. In this study, Quercetin nanocrystals (QNC) were synthesized and compared to standard QUE. A network-pharmacology-based methodology was applied, including target prediction, network construction, a gene ontology (GO) analysis, a KEGG pathway enrichment analysis, and molecular docking. This study aimed to identify the targets of QUE relevant to the treatment of Parkinson's disease and investigate the associated pharmacological mechanisms. Most of the predicted targets are involved in dopamine uptake during synaptic transmission. QUE regulates the key targets DRD2 and DRD4, which significantly affect dopaminergic synapses. The molecular docking results showed that QUE had a better binding affinity than the standard drug L-Dopa. From these experiments, it can be concluded that QNC effectively reduced the adverse effects caused by rotenone-induced oxidative stress in biochemical, neurochemical, and histopathological alterations. Therefore, QNC can potentially treat Parkinson's disease, and its effectiveness should be assessed in future clinical trials.

Keywords: Parkinson's disease; rotenone; quercetin nanocrystals (QNC); antioxidant system

1. Introduction

Parkinson's disease (PD), a neurodegenerative disorder commonly associated with aging, is caused by the progressive degradation of the dopaminergic neurons in the substantia nigra pars compacta (SNpc). This leads to the appearance of symptoms such as bradykinesia, tremors, and rigidity [1]. Recent research on brains affected by PD has

Abstract: One of the primary therapeutic approaches for managing Alzheimer's disease (AD) involves the modulation of Acetylcholine esterase (AChE) activity to elevate acetylcholine (ACh) levels inside the brain. The current study employed computational chemistry approaches to evaluate the inhibitory effects of CTN on AChE. The docking results showed that Citronellal (CTN) and standard Donepezil (DON) have a binding affinity of -6.5 and -9.2 Kcal/mol, respectively, towards AChE. Further studies using molecular dynamics (MD) simulations were carried out on these two compounds. Binding free energy calculations and ligand-protein binding patterns suggested that CTN has a binding affinity of -12.2078 . In contrast, DON has a much stronger binding relationship of -47.9969 , indicating that the standard DON has a much higher binding affinity than CTN for AChE. In an in vivo study, Alzheimer-type dementia was induced in mice by scopolamine (1.5 mg/kg/day i.p) for 14 days. CTN was administered (25 and 50 mg/kg. i.p) along with scopolamine (SCO) administration. DON (0.5 mg/kg orally) was used as a reference drug. CTN administration significantly improved the mice's behavior as evaluated by the Morris water maze test, evident from decreased escape latency to 65.4%, and in the CPS test, apparent from reduced escape latency to 69.8% compared to the positive control mice. Moreover, CTN significantly increased the activities of antioxidant enzymes such as catalase and superoxide dismutase (SOD) compared to SCO. Furthermore, CTN administration significantly decreased SCO-induced elevated AChE levels in mice. These results were supported by histopathological and in silico molecular docking studies. CTN may be a potential antioxidant and neuroprotective supplement.

Keywords: Citronellal (CTN); acetylcholine esterase; Alzheimer's disease (AD); molecular dynamic; antioxidant activity

1. Introduction

Alzheimer's disease (AD) is a progressive and incurable neurodegenerative disorder that affects the neurons in the brain [1]. According to the World Health Organization

Important Instructions

- The NTA Score of a candidate indicates the percentage of candidates who have scored EQUAL TO OR BELOW (same or lower raw marks) that candidate in that session.
- The NTA scores of a Candidate have been calculated as follows:
$$\frac{100 \times \text{Number of candidates appeared in the 'Session' with raw score EQUAL TO OR LESS than the candidate}}{\text{Total number of the candidates appeared in the 'Session'}}$$

NTA score is not the same as percentage of marks obtained.
- A National Merit Ranking (All India Rank) has been arrived on the basis of NTA Score.
- Candidates having same Score shall be listed in a chronological (ascending) order as per their date of birth.
- Candidates having same score would be given the same Merit, and the Merit number would be increased by the same number i.e. if there are two candidates at Merit 2, Merit 3 would not be awarded to the next candidate but Merit 4 would be given.
- The admission authorities are advised to use score awarded to the students for allotment of seat in the AICTE approved programs along with the other criteria that may exist, as applicable.
- Candidate's particulars including Category and Person with benchmark Disability(PwBD) have been indicated as

Cut-off	96.1812235	90.1695242	90.5716216	77.1061859	57.7465692

Result Date : 01.07.2023

Director, NTA

Important Instructions

- The NTA Score of a candidate indicates the percentage of candidates who have scored EQUAL TO OR BELOW (same or lower raw marks) that candidate in that session.
- The NTA scores of a Candidate have been calculated as follows:
$$\frac{100 \times \text{Number of candidates appeared in the 'Session' with raw score EQUAL TO OR LESS than the candidate}}{\text{Total number of the candidates appeared in the 'Session'}}$$

NTA score is not the same as percentage of marks obtained.
- A National Merit Ranking (All India Rank) has been arrived on the basis of NTA Score.
- Candidates having same Score shall be listed in a chronological (ascending) order as per their date of birth.
- Candidates having same score would be given the same Merit, and the Merit number would be increased by the same number i.e. if there are two candidates at Merit 2, Merit 3 would not be awarded to the next candidate but Merit 4 would be given.
- The admission authorities are advised to use score awarded to the students for allotment of seat in the AICTE approved programs along with the other criteria that may exist, as applicable.
- Candidate's particulars including Category and Person with benchmark Disability(PwBD) have been indicated as mentioned by the candidate in the online application form.
- Instances of incorrect information provided by the candidates, if detected at any stage, would make the candidate liable for disqualification.
