BREAST FEEDING AWARENESS PROGRAM

Dates: 01-08-2022 to 07-08-2022

Theme: Step up for Breastfeeding - Educate and Support

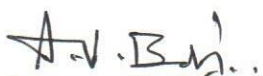

Venue: Santhiram General Hospital

Organized by: Santhiram General Hospital in association with Dept. of Pharmacy practice and NSS Unit, Santhiram College of Pharmacy

Breast milk is the natural first food for babies. Breastfeeding is not just good for child's nutritional and immunological needs; it is also good for mothers. It is estimated that improving breastfeeding rates could prevent an additional 20,000 maternal deaths from breast cancer. Although global initiation rates are relatively high, only 40% of all babies fewer than 6 months of age are exclusively breastfed and 45% continue breastfeeding up to 24 months of age. Scaling up optimal breastfeeding could prevent more than 823,000 child deaths each year. According to WHO malnutrition causes one in every three infant deaths in India. Further, 66% of the infant deaths occur during the first year of life. This is often caused by inappropriate feeding practices.

Hence 25 pharmacy students were participated in association with Santhiram general hospital para medical staff. They gave awareness to pregnant women and women who delivered. Program conducted from **01st August 2022 to 07th August 2022** at Santhiram General Hospital. Nearly 130 mothers were benefited by this program.

In this Program Dr. C. Madhusudhana Chetty Principal, SRCP, Dr. R. E. Ugandhar. HOD of Pharmacy practice, SRCP, NSS unit and students are also actively participated.
